## Description of the security update for Office 2013: April 10, 2018 (KB4018341)

This security update resolves vulnerabilities in Microsoft Office that could allow remote code execution if a user opens a specially crafted Office file. To learn more about these vulnerabilities, see [Microsoft Common Vulnerabilities and Exposures CVE-2018-1028](#).

## Description of the security update for Office 2013: April 10, 2018 (KB4011586)

This security update resolves vulnerabilities in Microsoft Office that could allow remote code execution if a user opens a specially crafted Office file. To learn more about these vulnerabilities, see [Microsoft Common Vulnerabilities and Exposures CVE-2018-1028](#).

## Description of the security update for Office 2013: April 10, 2018 (KB4018343)

This security update resolves vulnerabilities in Microsoft Office that could allow remote code execution if a user opens a specially crafted Office file. To learn more about these vulnerabilities, see [Microsoft Common Vulnerabilities and Exposures CVE-2018-1028](#).

## April 10, 2018, update for SharePoint Foundation 2013 (KB4018349)

This update fixes the following issues:

- The completed check mark column in **Task List** does not read out by screen reader and does not have the focus indication.
- When a website is deleted, records from Site Version for this website are not removed.
- When you view a calendar item in the Edit Page in SharePoint, you receive an unexpected error message that resembles the following:

Sorry, something went wrong  
An unexpected error has occurred.

This update also contains the following improvements:

- Updates the following outdated time zones:
  - Central Brazilian Standard Time (UTC-04:00) Cuiaba

- Fiji Standard Time (UTC+12:00) Fiji
  - Iran Standard Time (UTC+03:30) Tehran
  - Israel Standard Time (UTC+02:00) Jerusalem
  - Morocco Standard Time (UTC+00:00) Casablanca
  - Pacific SA Standard Time (UTC-04:00) Santiago
  - Pacific Standard Time (Mexico) (UTC-08:00) Baja California
  - Paraguay Standard Time (UTC-04:00) Asuncion
  - Syria Standard Time (UTC+02:00) Damascus
- Changes the retention policy to keep the number of records in the **TimerJobHistory** table from 10,000 to 3 days.

## April 10, 2018, update for SharePoint Enterprise Server 2013 (KB4011655)

This update contains the following improvement:

- Provides suitable translation for updated timezone labels.

## Description of the security update for Microsoft SharePoint Enterprise Server 2013: April 10, 2018 (KB4018342)

This security update resolves vulnerabilities in Microsoft Office that could allow remote code execution if a user opens a specially crafted Office file. To learn more about these vulnerabilities, see the following Microsoft Common Vulnerabilities and Exposures CVEs:

- [CVE-2018-1005](#)
- [CVE-2018-1014](#)
- [CVE-2018-1032](#)

April 10, 2018, update for SharePoint Enterprise Server 2016  
(KB4018340)

## Improvements and fixes

- This update fixes an issue that a double hash tag symbol (##) displays in an information message in all languages when you start following a hash tag (#).

## Description of the security update for SharePoint Enterprise Server 2016: April 10, 2018

This security update resolves vulnerabilities in Microsoft Office that could allow remote code execution if a user opens a specially crafted Office file. To learn more about these vulnerabilities, see the following Microsoft Common Vulnerabilities and Exposures CVEs:

- [CVE-2018-1005](#)
- [CVE-2018-1014](#)
- [CVE-2018-1028](#)
- [CVE-2018-1032](#)

**Note** To apply this security update, you must have the release version of SharePoint Enterprise Server 2016 installed on the computer.

This public update delivers Feature Pack 2 for SharePoint Server 2016, which contains the following feature:

- SharePoint Framework (SPFx)

This public update also delivers all the features that were included in Feature Pack 1 for SharePoint Server 2016, including:

- Administrative Actions Logging
- MinRole enhancements
- SharePoint Custom Tiles
- Hybrid Auditing (preview)
- Hybrid Taxonomy
- OneDrive API for SharePoint on-premises
- OneDrive for Business modern experience (available to Software Assurance customers)

The OneDrive for Business modern user experience requires an active Software Assurance contract at the time that the experience is enabled, either by installation of the public update or by manual enablement. If you don't have an active Software Assurance contract at the time of enablement, you must turn off the OneDrive for Business modern user experience.

## Improvements and fixes

This security update contains improvements and fixes for the following nonsecurity issues in SharePoint Server 2016:

- The look-up fields such as FileRef and FileDirRef fields cannot be filtered by using SharePoint Representational State Transfer (REST) APIs.
- When you select the **See conversations** link of a followed user, you receive the following error message:

Looks like somebody deleted this conversation.

- You still receive status report reminders even after you are removed from the response list.

This security update contains improvements and fixes for the following nonsecurity issues in Project Server 2016:

- Portfolio Analysis View displays incorrect availability and requirements information in certain conditions, depending on data and planning horizon settings.
- You cannot see Queue Job status because duplicated Project Publish reporting causes the Manage Queue page not to be loaded. In addition, you receive the following error message:

Sorry, something went wrong  
An unexpected error has occurred

- The Capacity Planning Views don't always display project assignments for each selected resource.
- When you change the definition of the Task Status field in the Task content type, the "In Progress" value that was deleted previously still appears occasionally.
- When the assignment actual work is missing in the published database, the timesheets pages don't load in single entry mode. In addition, you receive the following error message:

The view failed to load. Press OK to reload this view with the default settings. Press Cancel to select another view.

- When you create resource engagements from Project Web App(PWA), the PWA always uses 8 hours for one day instead of the expected setting from Enterprise Global.
- When you open projects from Project Center in Project Web App by using Internet Explorer 11 in Windows 7, you receive the following error message in the browser:

Action Not available -Project Professional needs to be installed to open the project.  
Install project and try again

- The title of Project Detail Pages displays encoded Unicode characters unexpectedly. For example, the character "&" in the title becomes "&amp;".
- You cannot create customer views that are based on filtering and grouping in Project Web App.
