September 12, 2017, update for SharePoint Server 2013 (KB4011133)

Improvements and fixes

- This update translates some terms in multiple languages to make sure that the meaning is accurate.
- This update removes additional quotation marks from ALT texts for the **Open Menu** command to make sure that screen readers can read the command correctly.

Description of the security update for SharePoint Server 2013: September 12, 2017 (KB3213560)

This security update resolves vulnerabilities in Microsoft Office that could allow remote code execution if a user opens a specially crafted Office file. To learn more about these vulnerabilities, see [Microsoft Common Vulnerabilities and Exposures CVE-2017-8742](#).

Description of the security update for SharePoint Server 2013: September 12, 2017 (KB4011113)

Improvements and fixes

This security update contains improvements and fixes for the following nonsecurity issues:

- Translate some terms in multiple languages to make sure that the meaning is accurate.
- When you select to show more posts on MySite host, some feeds may be missing.
- When you edit a video in asset library, screen reader doesn't indicate the state of the collapsing container.
- If the alternate access mapping URL of a site has changed after you followed it, you can't unfollow unless the alternate access mapping URL is changed back.

Description of the security update for SharePoint Foundation 2013: September 12, 2017 (KB4011117)

Improvements and fixes

This security update contains improvements and fixes for the following nonsecurity issues:

- Improve screen reader accessibility behavior for Person/Group fields on the NewForm.aspx and EditForm.aspx pages.
- FBA groups are incorrectly created with leading or trailing spaces if those spaces were present in the input in the people picker.
- When you use a property restriction that has an equals sign for an in-place search, all results are returned unexpectedly.
- When you open a calendar in Quick Edit mode and try to edit the end time of an event, you receive the following error message:

Invalid data has been used to update the list item.

September 12, 2017, update for SharePoint Server 2016 (KB4011112)

Improvements and fixes

This update modifies several terms in Dutch, Simplified Chinese and Romanian to make sure that the meaning is accurate. It also removes additional quotation marks from ALT texts for the **Open Menu** command to make sure that screen readers can read the command correctly in German.

Announcing Availability of Feature Pack 2 for SharePoint Server 2016

When we launched SharePoint Server 2016, we shared the vision for SharePoint Server 2016 as a foundational release, born in the cloud, and built for continuous innovation. Today we're pleased to announce our continued investments on this journey and commitment, the availability of Feature Pack 2.

Through the September 2017 Public Update for SharePoint Server 2016 we're delivering several new features based on customer feedback and developer needs, highlighting these investments, the SharePoint Framework.

The SharePoint Framework (SPFx) is a page and web part model that provides full support for client-side SharePoint development, easy integration with SharePoint data and support for open source tooling. With the SharePoint Framework, you can use modern web technologies and tools in your preferred development environment to build productive experiences and apps on SharePoint that are responsive and mobile-ready from day one!

Feature Pack 2 for SharePoint Server 2016 contains the foundation of modern web part hosting and editing experiences, including core SPFx APIs, SPFx package deployment, and property panes.

To learn more about these enhancements refer to <https://go.microsoft.com/fwlink/?linkid=856819>.

Download Feature Pack 2 at [https://technet.microsoft.com/en-us/library/mt715807\(v=office.16\).aspx#BKMK_2016](https://technet.microsoft.com/en-us/library/mt715807(v=office.16).aspx#BKMK_2016).

Feature Pack 2 also delivers all of the features previously included in Feature Pack 1 for SharePoint Server 2016, including:

- [Administrative Actions Logging](#)
- [MinRole enhancements](#)
- [SharePoint Custom Tiles](#)
- [Hybrid Auditing \(preview\)](#)
- [Hybrid Taxonomy](#)
- [OneDrive API for SharePoint on-premises](#)
- [OneDrive for Business modern experience](#) (available to Software Assurance customers)

To learn more about Feature Pack 1 refer to <https://go.microsoft.com/fwlink/?linkid=832679>.
